

TechNova Engineering Knowledge Base

Company Overview

TechNova Engineering is a software company with offices in Ahmedabad and Bangalore. The company develops backend systems, data platforms, and AI applications.

People and Roles

Rahul Sharma is a Senior Backend Engineer at TechNova Engineering. Rahul works from the Ahmedabad office. Priya Mehta is a Data Engineer at TechNova Engineering. Priya works from the Bangalore office.

Project Atlas

Rahul Sharma works on Project Atlas. Project Atlas is a backend application built using FastAPI, PostgreSQL, and Redis. Project Atlas is deployed on Amazon Web Services (AWS) in the Mumbai region.

Project Orion

Priya Mehta works on Project Orion. Project Orion is a data engineering platform built using Python, Neo4j, and Apache Spark. Project Orion is deployed on Amazon Web Services (AWS) in the Singapore region.

AI Platform

Rahul Sharma and Priya Mehta collaborate on the TechNova AI Platform. The AI Platform uses Neo4j to store knowledge graph relationships and a vector database to perform semantic search. The AI Platform is used to answer questions from internal engineering documents.

Relationships

Rahul Sharma works on Project Atlas. Project Atlas uses FastAPI, PostgreSQL, and Redis. Project Atlas is deployed in AWS Mumbai. Priya Mehta works on Project Orion. Project Orion uses Python, Neo4j, and Apache Spark. Project Orion is deployed in AWS Singapore. Rahul Sharma collaborates with Priya Mehta on the AI Platform. The AI Platform uses Neo4j and a vector database.

Additional Facts for GraphRAG Testing

Project Atlas and Project Orion are both associated with TechNova Engineering. Neo4j is used by Project Orion and the AI Platform, but Project Atlas does not use Neo4j. Rahul is associated with Ahmedabad, while Priya is associated with Bangalore. Project Atlas is associated with Mumbai, while Project Orion is associated with Singapore.
